Abstract

The Pathogenesy of Loxosceles Laeta was developed in 1998 and was published in 1999 in the book "The Pathogenesis of Loxosceles Laeta". The protocol, designed by Dr. Carlos Nestor Campora himself, called Double Protocol of Homoeopathic Pathogenetic Trial, has some individual characteristics, which made it undoubtedly successful, as the result, that is the medicine, has become 15 years later, a commonly used medicine by the group of homoeopaths who know about it and have incorporated it in their Repertories with 1900 symptoms. In this work, I want to present a summary of the Double Protocol of Homoeopathic Pathogenetic Trial, emphasizing what made it a High Quality design
